Little busters achievement guide

Author HeliosAlpha / Nov 2, 2017 We have prepared this guide based on the Perfect Visual Book to inform you of all the basic options needed to get on each route, as well as some general pointers on how to see as much content as possible. Happy reading, and be sure to join our Little Busters Bookclub!
This guide is based on flowchart available in perfect visual books for Little Busters! original and EX. These flowchart are mainly focused on important choices, so players are encouraged to explore other options for themselves. To complete the game, you need to first complete the ending of Rin1, Mio, Komari, Kurugaya, Haruka, Kud to unlock the Rin2 ending and abstain afterwards. Refrain is the original final route of the game; EX routes Saya, Sasami and Kanata have been added later and all require a refrain to be completed before they become available. For a better experience, we strongly recommend starting the game from the beginning whenever you want to try a new route. You'll miss a lot of content if you just upload back to your old save instead of reloading every time! And hey, you can make new progress on these mini-games. Our guide is presented in our recommended route

order, but it's quite flexible if you want to mix it up. For the maximum number of scenes, you want to follow the order of Komari -> Kurugaya -> Haruka ->. and throw Mio and Rin1 wherever you want. For the most enjoyable experience, we suggest doing Rin1 first. There are many people who think komari should go to Mio, but don't let us tell you how to play; make the experience yourself! The choice you do not want to select.Locing selection§ [Critical choices that become unavailable after the route is cleared and remains as follows until the refrain is complete]-Choices that may or may not appear. This is fine if it is not. - Tag (CG) means that the choice does not affect the route and is only relevant to complete the gallery. [Common Bad End] - This is a broad description of endings that are not usually the main bad ending. These endings can often be climbed through many different means. From the third play evening and beyond you can choose between two epilogues. Upon completion of the Refrain, a whole bunch of content becomes available. Most importantly, all previous heroin routes are unlocked and 3 more are added. You'll often find new content by playing old routes. Say's itinerary includes many unique mechanics, the most notable of which is the dungeon caterpillar. Please refer to the map below to help you navigate. The symbols of the map are as follows: S is the starting room for the floor. T marks a trap. A star is the goal that leads to the next floor. Yellow squares are enemy rooms. It can only be read until it is completed after hold. Playing via the Kuda route, select Mio as Kuda's neighbor on the 18th. After that, play with Masato 3 times during the overall rout. Masato is available for game time on dates 16.18, 19, 21, 22, 23 and 24.While in Kud route:---- Masato and me---- Muscle---- Muscle---- Muscle---- However, reaching MuscleThis requires you to get 45+ points in a mini-game cafeteria at 18/5 during the Rin route. My best advice is to simply pause the buffer by right-clicking or swiping up. The Ricky/Buck Ricky Idiot route is a variant of Say's itinerary, which slightly changes Ricky's personality for comedic effect. This route is only available after the completion of the Saia route at least once. This gives you an extra CG with tap games. You also a lot of funny dialogue. If you complete this route and then go to the true Saya itinerary, you'll get the chance to dodge Saia's kiss. This leads to some really funny scenes, but also a bad ending. This route is only available after the completion of the Saia route at least once. During playback, everyone dies 3 times on floors 1-7. Saia will give different answers to death, so you can stop when she starts repeating herself. This unlocks Ecstasy mode, which makes you invincible against normal enemies and allows you to fight Tokikaze (only if you have a mini-game enabled). I wish you a good shot. B6F: Open the sarcophagus in the upper room 3 times. B7F: First walk in form 8. After that, it fails 4 times. You can do this by just walking down from the starter room. Now you should get a heart meter below your health. The counter is filled in by taking damage. When it's full, you go into ecstasy mode, which treats you every time you take damage. Ordinary enemies can no longer kill you and you can damage Tokikaze in this mode. Note that he's still not an easy fight. You have to hit it 16 times to win.
